

MARCELO AVILA GARZA

Frontend Developer | React | Nuxt.js | Flask
Available for Part-Time Internship (20–30 hours/week)
Monterrey, Nuevo León, México

+52 81 2107 4621 | marcelo.avg06@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Engineering student at Universidad de Monterrey with hands-on experience designing and developing production-ready web applications using React, Nuxt.js and Flask. Strong background in frontend development, APIs and UX research. Passionate about building intuitive software solutions and currently seeking a part-time software development internship where I can contribute while continuing to grow professionally.

EDUCATION

Universidad de Monterrey
Engineering in Computational Technologies

Nuevo León, Mexico
Aug. 2024 – May 2028 (expected)

LANGUAGES

English: Professional Working Proficiency (B2)
Spanish: Native

EXPERIENCE

Freelance Web Developer

November 2025 – Present

MG Fianzas

- Designed and developed a responsive React-based corporate website for a financial services client, strengthening the company's online presence.
- Implemented reusable React components, responsive layouts and intuitive navigation to improve user experience across desktop and mobile devices.
- Managed the complete project lifecycle independently, including UI design, development, deployment and client communication.

Frontend developer

March. 2026 – Present

El Bug Farm

- Contributed to the development of a production web platform for Silverlake Conservatory of Music using Nuxt.js, Tailwind CSS and Hygraph CMS.
- Led the implementation of most frontend interfaces and developed client registration forms with a strong focus on usability and responsiveness.
- Collaborated with developers on frontend features and backend integrations within an agile team environment.
- The platform contributed to generating more than \$10,000 USD in revenue.

SOFT SKILLS

Communication • Problem Solving • Critical Thinking • Teamwork • Adaptability • Fast Learner • Time Management

PROJECTS

Smart Patient Flow System | *ESP32, Flask, NFC, Python*

- Developed an IoT-based system to monitor patient flow within a hospital using ESP32, Flask, and NFC (PN532).
- Implemented NFC card scanning to register patient access to waiting rooms.
- Integrated a beacon system to display real-time medical office availability.
- Connected hardware and backend components to automate hospital workflow processes.

UX Research Project | *UX Research, User-Centered Design*

- Selected among the top students in the course to participate in a UX research project at UDEM.
- Conducted user-centered research and analyzed user experience and interface design.
- Presented research findings and improvement proposals directly to the platform's development team.
- Received a certificate of participation in recognition of my contributions to the project.

TECHNICAL SKILLS

Languages: JavaScript, Python, C++, SQL, HTML, CSS.
Frontend: React, Nuxt.js, Tailwind CSS.
Backend: Flask, APIs REST.
Databases: PostgreSQL, MySQL, MongoDB.
IoT and Hardware: ESP32, Arduino, NFC (PN532).
Tools: Git, GitHub, Hygraph CMS, VS Code.
Concepts: Responsive Design, UX Research, User-Centered Design, Networking, Subnetting
